

Case Study: Kirkintilloch Baptist Church

KIRKINTILLOCH • BAPTIST • CHURCH

Kirkintilloch Baptist Church is a large and vibrant Christian church located just north of Glasgow. Services provided to the local community include a Food Bank, a Debt Centre, a Job Club as well as a thriving café and Toddlers Club.

Originally established in 1887 major renovations were carried out in 2006 with the opening of new modern facilities. Since then further improvements and extensions works have been carried out including the upgrade of heating plant with 2 x Strebels S-CB+ 60 boilers.

Installed by Morrison Heating Services Ltd the boilers provide heating and hot water to the Church premises for the benefit of all using the community centre. Selected on the merits of high efficiency and narrow width into a tight plantroom the boilers are individually flued and operate in cascade to meet the varying demands of the Church.

Location: Glasgow
Install: Winter 2019
Product: 2 x S-CB+60 Boilers

“

The Strebels S-CB+ boiler is a well put together unit which we like to install wherever we can. We don't have any complaints when we install these units.

”

Kevin Morrison, **Morrison Heating Services.**
